**OPINION AND REPORT ON A SURVEY OF YOUNG  
PEOPLE'S SEXUAL BEHAVIOUR AND AIDS  
PREVENTION**

## **OPINION**

The views of the National AIDS Council were sought by the Director of the ANRS, the national AIDS research agency, regarding the survey of young people's sexual behaviour and AIDS prevention planned by Coordinated Action no. 8.

After considering the matter in a working group and in plenary session, the Council approves this survey in principle. The Council does however request that the criticisms and statements contained in the enclosed report be taken into account, and stresses the necessity of ensuring total confidentiality throughout the survey.
